

TOY MONEY FOR USE AT SCHOOLS & TO PLAY
IN
THE NETHERLANDS
GULDEN & EURO, 1827 – 2010

Thomas Engelen – October 2025

INTRODUCTION

Even with the previous publication only a few months old, additional pieces were reported by a variety of collectors, errors pointed out, and the question if also Euro items could be included.

This publication adds a section on Euro material, expands the section on play-money used with board-games and – of course – an updated listing on toy money itself.

Twenty years ago Henderik Siepel wrote his publication on Dutch toy- & educational coins and their related paper money. With this, collecting these became easier, with the various types carefully described, and explained. (“De Rekengulden”, 2004).

Starting from there and helped by the internet and global marketplaces additional types and varieties have come to light. This 2025 catalogue also fills some of the gaps, adds, with new evidence now available. Yet this catalogue is best to be used alongside the work by Henderik Siepel: his work goes further on educational systems, educational tools, history of the suppliers of materials than this 2025 work which focusses on the coins, banknotes, and packaging used.

This publication has been written based pieces present in various collections. It neither pretends to be complete, or – indeed – to be correct in every aspect. If a piece is not listed, it is not necessarily rare: it was just not present in the collections that form the base of this catalogue.

Mistakes or errors are all mine.

Always keen to include additional pieces so please write with a description of any non-listed piece which should be in this catalogue to: muis100@hotmail.com. If pictures are required I'll gladly let you know.....

May this catalogue help in finding many new items for your collection: Happy Hunting !

ACKNOWLEDGEMENT

Many collectors have shared their knowledge, and – in some cases – allowed me to buy an item or two. I'd like to mention specifically:

Henderik Siepel, for writing his catalogue, “Speelgeld, Leergeld, Schoolgeld – De Rekengulden”, making Dutch toy coins and educational money more accessible, and better understood. It is still used by many collectors today,

Günter Aschoff, with his decades-long passionate bringing together details of German toy coins, plus German manufactured toy coins for export including to the Netherlands,

Lars A. Garde, for corrections to this listing and additional information on the Lauer coins including on pieces I had never seen before,

David Magnay, who shared his knowledge, archive, and who allowed me to buy his collection just before he died.

Heritage Auctions, Europe, Jacco Schepers, with much knowledge and helpful where needed,

The Newman Numismatic portal at Washington University, St. Louis, U.S.A. to enable this work to be read and downloaded free of charge by anyone interested, wherever they live. Thanks to Len Augsburger, Project Coordinator at the Newman Numismatic Portal, and Wayne Homren, Publisher, and Editor of the E-Sylum.

And all others who have contributed in any way for this catalogue now being available!

THE CATALOGUE

Included are pieces for which it is clear that they were distributed and played with, or used as educational material in the Netherlands. Because of the denominations on each piece, or by the shapes and sizes of those pieces when the words like CENT or GULDEN are not included.

The coins are mostly from cardboard, or plastic, a few from other material. The banknotes are mainly from cardboard, plastic or paper, ranging from sturdy cardboard to pieces which one could reproduce today on a decent copier machine.... A few packagings are included where known: boxes from cardboard, plastic, paper bags, plastic boxes and wallets, banknotes used at Dutch boardgames, and the more modern blister-packs. To present these helps in confirming Series as complete, but also adds the background, the context of these pieces. A few distributor catalogue pages where relevant are included as well.

Colour indications written as “silver”, “copper” etc: this refers to the *look* of the cardboard, or plastic item : so not *made of* silver, but having the *look of* a silver coin....

The catalogue is written in English to allow collectors not mastering Dutch to dip their toe into the Dutch toy money world. And.... most Dutch people speak English well.

The listing is in Series, rather than individual denominations as we have tried to present the context of individual pieces as part of a Series to which a piece belongs.

PICTURES

Items pictured are not to scale but chosen as to present the item at best. For wet-stamp items these are originally made inverted so the wet-stamp is correct) hence some of the pictures are inverted to display the wet-stamp in the picture more clearly.

NUMBERING

The listing is by Series, each Serie to have a unique number 1 – 199. Individual pieces are listed with the last digit: 1 for a ½ Cent piece, .22 for the 1.000 Gulden, and all others always using the same number in-between as per below:

1	1/2 Cent
2	1 Cent
3	2 1/2 Cent
4	5 Cent
5	10 Cent
6	25 Cent
7	1/2 Gulden
8	1 Gulden
9	2 1/2 Gulden
10	5 Gulden
11	10 Gulden
12	20 Gulden
13	25 Gulden
14	40 Gulden
15	50 Gulden
16	60 Gulden
17	100 Gulden
18	200 Gulden
19	250 Gulden
20	300 Gulden
21	500 Gulden
22	1.000 Gulden

Please note: up to including World War II the denominations were in cents. From 1948 this became cent. (without "s"). For sake of simplicity both a 5 Cent as well as a 5 Cents piece have the number 4 etc..

RARITY AND PRICING

No prices have been included as there are only few transactions even via the e-platforms in existence. Collecting toy-coins is a hobby, not an investment I'd say, and even if some pieces have attracted hundreds of Euros or more, a few even over a thousand, these are exceptions. Every now and then a bag of older material shows up, and what was rare, or very rare, becomes scarce at best. At the other end of the spectrum, we have the 1980's blister-packs, still seen regularly, but mostly for less than €10 or so. In a future edition price-indications might be introduced.

A BRIEF DESCRIPTION ON MANUFACTURERS AND DISTRIBUTORS

CHRISTIAN BALMBERGER (C.B.), NÜRNBERG, GERMANY:

Manufacturer of military decorations, medals, World War I emergency tokens for German cities, tokens and cardboard coin pieces, with export to Great Britain and The Netherlands. Their oldest known cardboard series is a 1888 dated set of 6 Great Britain denominations, one of which entered in the British Museum collection in 1888.

Series 10, 11, 12, 17 and 26 are certainly manufactured by Balmberger, Series 18 very likely as well.

DE VOET, EXLOO

Their name is known from packings of stamps for coins and banknotes, but very little is known of De Voet. Hopefully a version of this publication can bring details on the company offering wet ink stamps of both coins and banknotes..... Information welcome!

DOM PLASTIK, BAMBERG, GERMANY

A German toy manufacturer known for their wide range of a large variety of small plastic toys, including different plastic animal, soldiers, cowboy and American indian figures. They produced also plastic toy coins for German customers, and for inclusion in low priced blister-packs with plastic coins and banknotes including Dutch banknotes.

MAX HEIMBRECHT, BERLIN, GERMANY 1906 – 1924

Max Heimbrecht from Meissen joined a book printer in 1899 and opened an office in Berlin, Germany to organise a book mail-order company. Max Heimbrecht must have taken over the tools, if not the business, from Hugo Semmler or Hermann Rostock as his earliest cards have the same designs as Hugo Semmlers'. His name appears in the "Revue Numismatique" of 1906 mentioning "Geldsorten aller Länder "with 43 cards, as well as in a Prussian - German publication also dated 1906.

Max Heimbrecht sold the publishing rights to Walter Erhard, including the title "Die Geldsorten aller Länder", in March 1924.

HEUTINK INTERNATIONAL, NIJVERDAL AND ZELHEM

Reinier Willem Heutink founded in 1911 the company selling magazines, books and bibles. After the second World War the company expanded into educational material. Heutink bought in 2007 Nienhuis Montessori in the U.S.A., and in 2013 they bought Stempelfabriek & Jegro. Manufacturing sites were opened in Sri Lanka and China. In 2024 the Swedish company Lekolar Group, owned by Private Equity fund Nalka in Sweden, acquired a majority stake in Heutink International.

FIRMA A. HUISMAN, (F.A.H.M.), MEPPEL

Founded in 1904 as a bookseller, Huisman started as a printer in 1917 including of materials to schools. They complemented their printed materials to schools with school supplies from third parties. Known from coin-cards with glued Balmberger coins, Huisman used their nationwide

distribution to schools to also sell other products. No own produced to coins or banknotes are known.

JEGRO EDUCATIONAL, GRONINGEN

Founded in 1913 Jegro initially manufactured fine woodwork. In the sixties Jegro expanded into manufacturing educational materials and teaching aids. In 2009 Jegro merged with the Noord Nederlandse Stempel en Leermiddelenfabriek (N.N.S.L.), changing their name to Stempelfabriek & Jegro. In 2013 Stempelfabriek & Jegro was bought by Heutink International.

L. CHR. LAUER, NÜRNBERG, GERMANY:

Known as manufacturers of tokens and jetons since the 18th century, Lauer is known to toy-coin collectors as having produced miniature coins for over 20 countries, including for far-off countries like India, Türkiye, and the U.S.A. One “speelmunt” piece with portrait of Dutch King Willem III is known, but the “jury is out” if Lauer also produced toy coins for the Netherlands.

J. VAN LINDERT, CUYK A/D MAAS

Their name was found on an old wooden stock-box with embossed cardboard coins Willem III and the young Queen Wilhelmina including a few so called “night quarters” 5 Cents 1907 pieces. The content is clearly by C. Balmberger. No other products are known by van Lindert.

LIPS'S BRANDKASTEN EN SLOTFABRIEK NV, DORDRECHT AND ROTTERDAM

Founded in 1871 in Dordrecht, The Netherlands, Lips was a manufacturer of keys, safes and metal heating stoves. They expanded into Belgium and Italy before the second world War. They were listed at the Dutch stock exchange and taken over in 1971 by British competitor Chubb.

A neat toy coin box, plus three denominations of toy-coins were made early 1950's, no doubt filling a vacuum in supply before plastic became popular as material for toy coins.

D.P. LUIJENDIJK, VOORBURG

Manufacturers of wooden children's toys including jigsaw puzzles, and wooden test material for primary schools based Fröbel principles, (1920 – 1930). Later, for a brief period in the 1950's they produced a small range of wet ink coin stamps with date 1948 for use at schools. No later coin stamps have been found so likely a one-off production.

MALMBERG, DEN BOSCH

Malmberg was a printer of books and magazines, and a suppliers of school materials nation-wide. In their 1923 catalogue a set of 11 cardboard coins was offered. This was the same set of ten coins as offered by Rikkers before 1900, but with the small silver 5 cents replaced by the square 5 Cents. The 5 Gulden was added as coin number 11. In 1939 the new design with portrait of Queen Wilhelmina was distributed. After World War II, Malmberg imported – again – from Balmberger a set of coins supplemented by own manufactured banknotes of 1 – and 2 ½ Gulden (Series 26). From 1954 Malmberg started to source plastic coins, from other suppliers. After many complains of misuse, a Series on square planchets was offered (Series 28). In 1970 Malmberg discontinued supplying school materials.

MANURBA, STRIEGAU, GERMANY

Known for a wide range of plastic figurines supplied as give away in Germany with a purchase of household butter. Manurba also produced low priced plastic packing materials for the food industry, and two of the plastic coin Series to Malmberg. (Series 23 and 24) The company closed in 1970.

DE NEDERLANDSE SCHOOLCHEQUE EN GIRODIENST, DEN HAAG

Little is known from this institute other than a few seldom-seen banknotes. Printed with “DE NEDERLANDSE SCHOOLBANK” a few colour - varieties are known as well: see Series 43 for details. No other Series from this source are known.

NEERBOSCH UITGEVERIJ, NIJMEGEN

In a small village Neerbosch, a suburb of the city of Nijmegen, a school was founded in 1863 to cater for primary school children, and for vocational training up to age around 15 years. This included preparing children to become a carpenter, shop assistant, cook, brick layer, and printer. Initially for their own internal use Neerbosch developed a range of banknotes for training purposes. Later they supplied these banknotes to others, especially distributors of toy coins to schools, like Malmberg, and Samsom. In 1965 the printing facility at Neerbosch was closed, and tools sold to Voorhoeve.

GEBROEDERS VAN NIFTERIK, PUTTE

Together with Philips NV the oldest company in the Netherlands to manufacture baculite products. (1923). In 1950 they added mouldable plastics to their range. Likely only a small side-line, they were manufacturers of Series 33, dated 1957 and 1961, supplied to Malmberg and to the N.N.S.L.. These plastic coins were identical to those in circulation with a similar colour and diameter. Abuse all around, there were many complaints from angry retailers and shopkeepers in which the police, the Nederlandse Bank, and other authorities are requested to stop the supply of these coins. It lasted until 1965 for that to happen.....

NOORD NEDERLANDSE STEMPEL- EN LEERMIDDELENFABRIEK (N.N.S.L), GRONINGEN

Founded in 1948, the N.N.S.L. manufactured a range of mainly wooden school materials including counting frames, building blocks with letters, and a range of wet ink stamps with many different motives for class programs ranging from history -, geographical – and biology subjects. The wet ink stamps with coins were a part of the program, together with coins and banknotes in large format to use in classroom teaching. In 2009 N.N.S.L. merged with Jegro, renaming into Stempelfabriek & Jegro. They were bought in 2013 by Heutink International. In 2020 production at the former N.N.S.L. facilities was halted and transferred to other manufacturing sites.

PANDA TOYS, AMSTERDAM:

Known from a blister-pack of modern play coins and bank notes, Series 80. Most likely an importer rather than a producer, to be confirmed.

RIKKERS, AMSTERDAM

Rikkers was a well-known distributor of fountain pens and their accessories around 1900. The Rikkers' name appeared in an article of a numismatic publication in 1901, describing Rikkers as the distributor of a Set of 10 Dutch cardboard coins. From the description these look like the coins from Series 10, 11 and 12, and possibly the 5 cent listed as 7.4 (date different though).

HERMANN ROSTOCK - HERMANN KUNSTVERLAG, NORDHAUSEN AND BERLIN, GERMANY (1906 – 1908)

In "Berliner Münzblätter", a publication dated 1908, Hermann Rostock is mentioned as the formal successor of Hugo Semmler ("Nachfolger"). The description of activities mentions "Münzkarten mit den Geldsorten aller Länder", describes the educational purposes of the cards, and that 45 cards including flags have been published and with additional ones in preparation. From 1908 his name doesn't appear anymore but replaced by Max Heimbrecht.

SAMSOM UITGEVERIJ, ALPHEN AAN DE RIJN

Samsom were printers of books and magazines, including of material for use at schools like exercise books, and books printed with read – and calculation exercises. In the period 1930 – 1950 they distributed the Balmberger cardboard coins, followed by their own manufactured series in cardboard dated 1954. (Series 31), and the two banknotes of Series 31. From 1960 the banknotes were sourced from Neerbosch Series 40. Samsom discontinued school supplies in 1973.

HUGO SEMMLER MAGDEBURG, MAGDEBURG AND BERLIN, GERMANY (1903 – 1906)

The first manufacturer of coin-cards with currency exchange tables is Hugo Semmler Magdeburg. Only on the very rare first series the name is stated in full, but later mostly found as H.S.M. A patent was applied for as "Gebrauchsmuster", a form of "Use Patent", on the 7th of February 1903 which was granted under number 198266.

Cards by Semmler are mostly found in German (post-dated from 31st Dec 1903, French (from 5th May 1904), and English (from 24th June 1904), but a series was issued also in Russian (from 8th July 1907), bi-lingual Russian and French (no dated cards known), and in Czech (no dated cards known). All have country-names in the exchange rate tables, and a country-flag. Cards can be identified by the H.S.M. initials, or by the German patent number as above, or both.

SIMPLEX, STEINMEYER & CO, AALST

A distributor of school materials post-World War II. Their program included plastic coins (Series 33 and 34), beautifully made and – one would think – sufficiently different from real currency in circulation. They also supplied via retailers these coins as play / pretend shop money. The two red plastic coins, Series 34, were included in boxes for home use teaching children to use money.

After complaints about misuse, Simplex changed supply to plastic coins with just digits (1, 5, 10, 25 and 100).

CHRISTIAN TANNER, STUTTGART, GERMANY

In Germany one of the largest suppliers of low-priced toy money play sets, from around 1965 including the launch of the Euro. The sets are in a robust packing, and covered with a hard plastic transparent outer as a trademark of Tanner. Both the banknotes and toy coins are manufactured by Tanner rather than third party products packaged.

TOI – TOYS, EINDHOVEN

Since around 1990 Toi – Toys has been importing and re-packing low – priced toys from low cost countries, for distribution to Western Europe. They supply mainly B-range (non-branded) toy products, competing with brand leaders like Mattel but in a lower price segment. The toy-money sets found distributed by them are clearly from material from different sources, like Great Britain and German toy coins packaged with Dutch toy banknotes.

UITGEVERIJ J. N. VOORHOEVE, DEN HAAG

Voorhoeve bought in 1965 from Neerbosch the tools and molds to print school banknotes. Initially they continued with the uniface Neerbosch designs unchanged, later printing the reverse with their own logo. A 5 Gulden banknote was added to the range. These banknotes printed on both sides are scarcer as the Dutch Central Bank issued guidelines for producing school – and toy money forbidding banknotes printed on both sides. Around 1970 Voorhoeve discontinued supplying these banknotes

WALTER ERHARD, WAIBLINGEN, ALTENSTEIG AND WILDBERG, GERMANY (1924 – 1938)

Walter Erhard bought the printing rights and tools from Max Heimbrecht in 1924. New markets for coin-cards with exchange rate tables opened up, next to use at Schools, and for travellers overseas.

Also, with cards for “new” countries established after World War I Walter Erhard was able to expand on the coin-card offering attracting both old and new customers.

The last set of coin-cards includes German Design with a 1938 dated coin representing the last coin-card manufactured by Walter Erhard.

7. VARIOUS EMBOSSED CARDBOARD PRE – 1890, C. BALMBERGER & DE NEDERLANDSE MUNT

Several embossed cardboard pieces are known with portrait Willem III pre-1890. Some are only found in the Dutch National Numismatic Collection, a few in private hands. Those only found in the Dutch National Numismatic Collection might be trial strikes rather than toy coins – yet the Dutch National Numismatic Collection has listed them as toy coins hence included in this list.....All are excessively rare.

It is assumed 7.4 and 7.7 were manufactured by C. Balmberger, as both types have been found with other embossed cardboard coins by Balmberger.

7.4: 5 Cents, 1883, year barely visible. Only one piece known in private hands. Found in a lot of tokens at a Heritage Europe auction.

7.7: ½ Gulden 1827. Portrait Willem III, an anachronism. Silver coloured cardboard. A few pieces in private hands.

7.8: 1 Gulden, 1855. Portrait Willem III. Silver coloured cardboard. Dutch National Numismatic Collection

7.9a: 2 ½ Gulden 1856. Portrait Willem III. Silver coloured cardboard. Dutch National Numismatic Collection

7.9b: 2 ½ Gulden, 1874. Silver, 39mm. Silver coloured cardboard. Auction Heritage Europe, May 2023, lot 193, €260.00

7.11: 10 Gulden, 1875. Messing coloured cardboard, 22mm. Dutch National Numismatic Collection and one in private hands. Auctioned at Heritage Europe, May 2021, lot 148, for €5.000.

8. L. CHR. LAUER NÜRNBERG, 1888, AN ENIGMA.....

A Lauer "Speelmunt" is known with portrait of Dutch King Willem III.

A Danish collector reported he once owned a Lauer 10 cents 1888 with portrait of Dutch King Willem III, and text "L. Chr. LAUER NÜRNBERG". next to the portrait. He had bought the piece in 1972 believing it to be a genuine 10 cents currency coin. As the year 1888 was not struck for circulation he showed the piece to a Copenhagen coin dealer who pointed out the Lauer text, and telling the piece to be a toy coin without value. The piece was magnetic, with full silver lustre. The owner regrets until today the swap with other coins a few years later.

The collector reporting is a life-long collector, one of the more serious collector of , amongst others, toy coins. To date no Dutch Lauer toy coin pieces have come to light and the only evidence they might exists is as per the reporting above. Most likely, somewhere, somehow Dutch Lauer pieces will show up.....

8.5: 10 Cents, 1888. Silver plated iron, 13mm. Existence to be confirmed

Lauer toy coins have been found for Austria-Hungary, Belgium, Bulgaria, Denmark, France, Germany, Great Britain, Greece, India (British), Portugal, Romania, Russia, Serbia, Spain, Sweden, Switzerland, Türkiye and the U.S.A..

10. SAMSOM, EMBOSSED COPPER COLOURED CARDBOARD COINS DATED PRE-1900

Embossed cardboard coins manufactured by C. Balmberger in Nürnberg, Germany. These were distributed in the Netherlands mainly by Samsom. They are found together with the silver-coloured coins with portrait of King Willem III on coins dated 1897 and with portrait of Queen Wilhelmina (dated 1892 -1912). In a 1931 Samsom catalogue these copper coloured cardboard coins are still listed, unchanged, even if dated some 40 – 50 years earlier.

It has not been possible to allocate in which order the varieties of each denomination were produced and to which silver coloured cardboard coins they (exclusively or not) belong as they are found mixed with Series 11 and 12 silver coins in various combinations.

10.1a: ½ Cent, * in place of the date. Obverse: NEDERLANDE, 41 pearls. 14mm.

10.1b: ½ Cent, as 10.1a, 53 pearls

10.3a: 2 ½ Cent, 1894. CENT ending outside ½, mint master symbol small

10.3b: 2 ½ Cent, 1894. CENT ending under ½, mint master symbol large

11. SAMSOM, EMBOSSED SILVER COLOURED CARDBOARD COINS 1897, PORTRAIT KING WILLEM III

Two denominations of embossed cardboard coins dated 1897 with portrait of King Willem III are known. An anachronism, as Willem III died 1890 Distributed by Samsom, manufactured by C. Balmberger, the $\frac{1}{2}$ Gulden with C.B. under the bust. The 2 $\frac{1}{2}$ Gulden is known with the correct spelling of the name of the King, Willem, but also with the German spelling, Wilhelm.....An interesting few cardboard coins.....

11.7a: $\frac{1}{2}$ Gulden, 1897. Portrait King Willem III. Medal strike.

11.7b: $\frac{1}{2}$ Gulden, 1897. As 11.7 but coin strike

11.9a: 2 $\frac{1}{2}$ Gulden, 1897. 38mm, 3 small stars, WILLEM III (the Dutch spelling)

11.9b: 2 $\frac{1}{2}$ Gulden, 1897. 38 mm, 3 large stars, WILHELM III (the German spelling)

Wooden stock-box by J. van Lindert, content 10 X 10 different denominations, mixed portraits.

In this box were 10 pieces 5 Cents 1907, number 17.4 – until now the only ten pieces ever found of this denomination in cardboard.

12. SAMSOM, EMBOSSED COINS 1892 AND 1897, PORTRAIT QUEEN WILHELMINA

A neat series of embossed cardboard coins with the young Queen Wilhelmina, portrait as before her coronation in 1898. The Series includes a 2 ½ Gulden 1892, and the “gold” 10 Gulden. The 2 ½ Gulden 1892 has the edge covered with silver: a rarity for cardboard toy coins. No 2 ½ Gulden pieces dated 1892 were struck for circulation in the Netherlands so a peculiar piece in cardboard.....As series 10 and 11 likely manufactured by C. Balmberger, Nürnberg.

12.5a: 10 Cents, 1897. Silver coloured cardboard, 15mm. High “S” in CENTS

12.5b: 10 Cents, 1897. Silver coloured cardboard, 15mm. Aligned “S” in CENTS

12.11b: 10 Gulden, 1897. As 12.11 but large letters, small stars

Wooden box with content to test children on academic skills....with cardboard coins Series 10 - 12

13. GREAT BRITAIN MULE WITH THE NETHERLANDS, SIXPENCE WITH 25 CENTS, 1897

A rather peculiar combination of the portrait of King Edward VII of Great Britain on a Sixpence with on the other side "25 cents 1897" as from a Dutch coin under Princess Wilhelmina. From a box with British embossed cardboard coins dated 1902 – 1905. Listed also in the catalogue "Cardboard Coins of Great Britain 1847 – 2000" as number 1068

13.6: 25 Cents (Sixpence), 1897, mule. Silver coloured cardboard, 19mm

14. EARLY 1900 COIN SERIES “SCHOOL” IN COPPER AND IRON.

From an unknown manufacturer this series of nicely styled coins, with the word “SCHOOL” on each clearly for educational purposes. From style and material, we estimate these are from the early 1900's. A set of banknotes with designs from banknotes circulating around this period is listed as series 15. Not certain if they belong together but possibly a match.

14.2: 1 Cent, ND. Copper plated, 21mm.

14.3: 2 ½ Cent, ND. Copper plated, 24mm

14.6: 25 Cents, ND. Nickel plated, 21mm

14.7: 50 Cents, ND. Nickel plated, 24mm

14.9: 250 Cents, ND. Nickel plated, 38mm

15. EARLY 1900 BANKNOTE SERIES “SCHOOL”, PAPER

A single series of banknotes known in a private collection in Amsterdam which might compliment the coin School Series above. This set was found at a flea market in Amsterdam – until now the only set ever found. Uniface, not dated, all with “SCHOOL” prominently printed. Each banknote has the

characteristics of banknotes circulating in the Netherlands early 1900, including denominations mainly seen in that period hence the attribution timewise.

15.11: 10 Gulden, brown on crème, 168mm X 102mm.

15.13: 25 Gulden, black on orange, 208mm X 107mm

15.14: 40 Gulden, black on green, 213mm X 105mm

15.15: 50 Gulden, blue on crème, 170mm X 105mm

15.22: 1.000 Gulden, black on white, 217mm X 120mm

16. MUNTBILJET, 1920, OR WITHOUT DATE

A series with decorative designs, printed on very thick paper, without date or dated 15th January 1920 (100 Gulden only), and / or with serial numbers. Not certain if used at schools, or other purposes. Other denominations highly likely exist. Information welcome!

16.4: 5 Cent, no date. Black on off-white. 154mm X 88mm

16.9: 2 ½ Gulden, no date. Black on off-white. Serial number YX 07039. 174mm X 102mm

16.17: 100 Gulden, 15 Januari 1920. Black on green. Serial number AX 0281. 193mm X 136mm

16.22: 1.000 Gulden, no date. Two signatures, black on white, XY 07986. 202mm X 138mm

17. SAMSOM, EMBOSSED CARDBOARD COINS 1898 - 1912, QUEEN WILHELMINA

A few denominations were produced by Balmberger for Samsom to supplement the older cardboard series with coins with a revised, modern design. These are found therefore in mixed boxes of cardboard coins as single pieces, not representing a whole new series.

17.4: 5 Cents, 1907. Silver coloured cardboard, 18mm. Replacing the tiny silver 5 Cents portrait King Willem III

17.8: 1 Gulden, 1898. Silver coloured cardboard, 28mm. Coronation portrait Queen Wilhelmina.

17.10a: 5 Gulden, 1912. Yellow bronze coloured cardboard, 18mm. Medal strike

17.10b: 5 Gulden, 1912. As 17.10a but coin strike

18. SAMSOM, EMBOSSED CARDBOARD COINS 1935 - 1939, PORTRAIT QUEEN WILHELMINA

This series was produced around 1939, not long before the outbreak of WW II. These coins are with the portrait of the Dutch Queen and have only been used at schools for a very short period under the German Occupation. A set is known from a salesman sample framed for presentation purposes confirming this is a complete set.

- 18.1:** ½ Cent, 1938. Copper coloured cardboard, 14mm
- 18.2:** 1 Cent, 1937. Copper coloured cardboard, 19mm
- 18.3:** 2 ½ Cent, 1939. Copper coloured cardboard, 24mm

19. DE NEDERLANDSE BANK - 50 GULDEN "VOOR SCHOOLGEBRUIK", 7 MEI 1945

On a rather wrinkled piece of white thick paper a 50 Gulden banknote, obverse and reverse, black print, with text "VOOR SCHOOLGEBRUIK" on each side, and "DE NEDERLANDSE BANK". The date, 7th Mei (May) 1945, is three days after the liberation of the Netherlands from the German Occupation: coincidence?

No other banknotes of this Series are known, neither a finished product of the 50 Gulden.

19.20a: 50 Gulden, obverse, "VOOR SCHOOLGEBRUIK" printed. Paper, 147mm X 65mm

19.20b: 50 Gulden, reverse, 7th May 1945, number CE 061772. Paper, 147mm X 65mm

An iron cliché of this banknote, reverse only. Information very welcome!!

20. MALMBERG, PAPER COINS, BROWN PAPER, 1933 AND 1948

A neat Series printed on sturdy paper, no doubt distributed quite soon after World War II ended. The 1 Cent – 10 Cent pieces have the old portrait of Queen Wilhelmina as on the 1948 Dutch coins, the 25 Cent, 1 Gulden and 2 ½ Gulden the pre-World-War II portrait of the Queen. Of note: no 25 Cent 1948 was issued with this portrait: a peculiar combination of a pre- WW II portrait on a post WW II dated coin !

20.2a: 1 Cent, 1948. Light brown paper, 18mm

20.2b: 1 Cent, 1948. Dark brown paper, 18mm

20.4: 5 Cent, 1948. Brown paper, 21mm

20.5: 10 Cent, 1948. Brown paper, 14mm

20.6: 25 Cent, 1948. Brown paper, 19mm. Portrait Wilhelmina pre – WW II

20.8: 1 Gulden, 1933. Brown paper, 29mm. Portrait Wilhelmina pre-WW II

20.9: 2 ½ Gulden, 1933. Brown paper, 33m. Portrait Wilhelmina pre-WW II

21. MALMBERG, PAPER COINS, BROWN AND SILVERED PAPER, 1933, 1948 AND 1954

A second Series in paper distributed by Malmberg, this is a more recent & updated Series to Series 20: the 10 Cents onward have a “silvered” look, and the portrait on the 25 Cent now corrected. Only the 1 Gulden 1933 still with the pre-WW II portrait, even if these pre-WW II coins were already long withdrawn by law in 1954.

21.2a: 1 Cent, 1948. Brown paper, 18mm. Portrait Queen Wilhelmina post WW II

21.2b: 1 Cent, 1954. Brown paper, 18mm. Portrait Queen Juliana

21.4: 5 Cent, 1948. Brown paper, 21mm. Portrait Queen Wilhelmina post WW II

21.5: 10 Cent, 1948. Silvered paper, 14mm. Portrait Queen Wilhelmina post WW II

21.6: 25 Cent, 1954. Silvered paper, 19mm. Portrait Queen Juliana

21.8: 1 Gulden, 1933. Silvered paper, 29mm. Portrait Queen Wilhelmina pre-WW II

Wooden stock box, no label, found with series 20 and 21 coins

23. SIMPLEX SPEELGELD LEERGELD, PLASTIC, QUEEN WILHELMINA AND QUEEN JULIANA

A nice plastic Series, including a 1 Gulden piece 1955. Manufactured for Simplex by Manurba in Germany. Inspite the designs being different to circulation issues, abuse was easy in vending machines hence many protests.....

23.2: 1 Cent, 1948. Bronze coloured plastic, 17mm. Portrait Queen Wilhelmina

23.4: 5 Cent, 1956. Bronze coloured plastic, 21mm. Portrait Queen Juliana

23.5: 10 Cent, 1951. Grey plastic, 16mm. Portrait Queen Juliana

23.6: 25 Cent, 1948. Grey plastic, 20mm. Portrait Queen Wilhelmina

23.8: 1 Gulden, 1955. Grey plastic, 26mm. Portrait Queen Juliana

24. SIMPLEX SPEELGELD LEERGELD, RED PLASTIC, QUEEN WILHELMINA AND QUEEN JULIANA

From Manurba as well, these were produced for Simplex for educational play sets to help children become familiar calculating with coins as part of a home calculation playset.

24.2: 1 Cent, 1948. Red plastic, 17mm. Portrait Queen Wilhelmina

24.4: 5 Cent, 1956. Red plastic, 21mm. Portrait Queen Juliana

26. SAMSOM, CARDBOARD EMBOSSED, 1950 - 1960, & SAMSON PAPER BANKNOTES

A letter from Dutch Customs survived in which the Nederlandse Bank is requested to approve the importation of these cardboard coins confirming the manufacturer as C. Balmberger, to be shipped to importer Samsom. The request was clearly granted.....The banknotes are by Samsom, and quite scarce since the 1 and 2 ½ Gulden coins became available shortly thereafter.

- 26.2:** 1 Cent, 1950. Bronze coloured plastic, 17mm
- 26.4:** 5 Cent, 1950. Bronze coloured plastic, 21mm

27. LIPS BRANDKASTEN EN SLOTFABRIEK N.V., (LIPS), EARLY 1950'S

The production of toy – coins was most likely a one – off: only three denominations in an original box, and these denominations and box are hardly ever seen. A neat toy coin box, plus three denominations of toy-coins were made early 1950's, no doubt filling a vacuum in supply before plastic became popular as material for toy coins.

27.2: 1 (Cent), no date. Iron, 17mm

27.4: 5 (Cent), no date. Iron, 21mm

27.5: 10 (Cent), no date. Iron, 15mm

28. MALMBERG, PLASTIC, SQUARE PLANCHETS, 1952

Tip neck points to "N" tip neck points to "E" tip neck points to "EN" tip neck points to "ED"

After many protests by retailers on the misused of round plastic coins to be passed for real money, Malmberg decided to distribute this Series of coins on square planchets. These are neatly executed, sharply moulded pieces, and with great eye-appeal. At least four different varieties exist with the

Queen's tip of the neck pointing at different part of the rim – lettering, implying different molds. This is the only Series known on square planchet – it is not clear why this was abandoned after this Series.

28.2: 1 Cent, 1952. Yellow Bronze coloured square planchet, 16mm X 16mm

28.4: 5 Cent, 1952. Yellow bronze coloured, square planchet, 20mm X 20MM

28.5: 10 Cent, 1952. Grey coloured, square planchet, 14mm X 14mm

28.6: 25 Cent, 1952. Grey coloured, square planchet, 18mm X 18mm

Round plastic box from transparent plastic containing assorted 28.2 – 28.6 pieces

29. MALMBERG, PLASTIC, 1952 – 1954

Next to toy coins on square planchets, Malmberg distributed a Series with clear colour-difference to the real coins. As such, they could still be passed on for real in, for instance, vending machines so this didn't turn out to be a long-lasting solution.

29.2: 1 Cent, 1952. Dark brown coloured plastic, 17mm

29.4a: 5 Cent, 1952. Dark brown coloured plastic, 21mm

29.4b: 5 Cent, 1952. Dark brown coloured plastic, 21mm

29.5: 10 Cent, 1952. White coloured plastic, 15mm

29.6: 25 Cent, 1952. White coloured plastic, 19mm

29.8a: 1 Gulden, 1954. White coloured plastic, 26mm

29.8b: 1 Gulden, 1954. White coloured plastic, 26mm

30. MANUFACTURER UNKNOWN, CARDBOARD, SHINY FINISH, 1952 AND 1954

A nice set of only four denominations, very well executed looking like the real coins in circulation. All are cardboard, with a shiny finish. Possibly produced by Balmberger as for the superior finish in cardboard.

30.2: 1 Cent, 1952. Cardboard, shiny yellow bronze coloured, 17mm

30.4: 5 Cent, 1954. Cardboard, shiny yellow bronze coloured, 21mm

30.5: 10 Cent, 1954. Cardboard, shiny silver coloured, 15mm

30.6: 25 Cent, 1954. Cardboard, shiny silver coloured, 20mm

Small tins with label “TELLEN MET GELD and “IK GA WAT KOPEN”, content series 30 and 40.
 (“counting money”, and “I m going to buy something”)

31. SAMSOM, CARDBOARD, 1950, 1955 AND 1960, WITH BANKNOTES

A nice Series of coins and banknotes distributed by Samsom. The cardboard coins manufactured by Balmberger, the banknotes likely Samsom' own production.

31.2: 1 Cent, 1950. Yellow bronze coloured plastic, 17mm

31.4: 5 Cent, 1950. Yellow bronze coloured plastic, 21mm

31.5: 10 Cent, 1950. Silver coloured plastic, 15mm

31.6: 25 Cent, 1950. Silver coloured plastic, 20mm

31.8: 1 Gulden, 1955. Silver coloured plastic, 25mm

31.9: 2 1/2 Gulden, 1960. Silver coloured plastic, 34mm

31.10. 5 Gulden, no date. Paper, uniface, green print. 136mm X 75mm

31.11: 10 Gulden, no date. Paper, uniface, blue print. 148mm X 82mm

31.12: 25 Gulden, no date. Paper, uniface, red print. 156mm X 88mm

31.15: 100 Gulden, no date. Paper, uniface, brown print. 170mm X 98mm

32. UNKNOWN MANUFACTURER, PLASTIC, 1952, 1957 AND 1959

A nice trio of plastic coins, looking very much like the real coins in circulation. No doubt additional denominations will show up.

32.6: 25 Cent, 1952. Silver coloured plastic, 20mm

32.8: 1 Gulden, 1957. Silver coloured plastic, 25mm

32.9: 2 1/2 Gulden, 1959. Silver coloured plastic, 34mm

33. NOORD NEDERLANDSE STEMPPEL – EN LEERMIDDELENFABRIEK (N.N.S.L), PLASTIC, DATED 1955, 1957 AND 1961

Series much used at the Dutch primary schools, also as these plastic coins were very much alike the real coins in circulation. The Mintmaster at the Rijksmunt received many complaints from shopkeepers and the like as a result....but for many years these were pretty much the standard educational coins Dutch children grew up with.....

From sturdy plastic, two versions are known: with smooth surfaces, and sharp moulding (a), and with coarse surfaces, the moulding slightly less sharp (b).

33.2a: 1 Cent 1955. Brown coloured plastic, 17mm

33.2b: 1 Cent, 1955. Brown coloured plastic, 17mm

33.4: 5 Cent, 1955. Brown coloured plastic, 22mm

33.5a: 10 Cent, 1955. Grey coloured plastic, 15mm

33.5b: 10 cent, 1955. Grey coloured plastic, 15mm

33.6a: 25 Cent, 1955. Grey coloured plastic, 20mm

33.6b: 25 Cent, 1955. Grey coloured plastic, 20mm

33.8a: 1 Gulden, 1957. Grey coloured plastic, 26mm

33.8b: 1 Gulden, 1961. Grey coloured plastic, 26mm

33.9: 2 ½ Gulden, 1961. Grey coloured plastic, 34mm

35. UNKNOWN MANUFACTURER. OBVERSE = REVERSE, 1957

Series from an unknown manufacturer. All dated 1957, and with the obverse the same as the reverse: no portraits. The 2 ½ Gulden has not yet been seen, possible not part of the Series.

35.2: 1 Cent, 1957. Bronze coloured plastic, 15mm

35.4: 5 Cent, 1957. Bronze coloured plastic, 19mm

35.5: 10 Cent, 1957. Grey coloured plastic, 17mm

35.6: 25 Cent, 1957. Grey coloured plastic, 17mm

35.8: 1 Gulden, 1957. Grey coloured plastic, 23mm

40. NEERBOSCH, BANKNOTES PAPER, UNIFACE

Initially for their own internal use the vocational school Neerbosch developed a range of banknotes for training purposes. Later they supplied these banknotes to others, especially distributors of toy coins to schools, like Malmberg, and Samsom. In 1965 the printing facility at Neerbosch was closed, and tools sold to Voorhoeve.

Colour varieties in print, and in paper exist. None are specifically rare.

- 40.8:** 1 Gulden, light grey to dark grey
- 40.9:** 2 ½ Gulden, light brown, dark brown and purple (laminated)
- 40.11:** 10 Gulden, light blue and medium blue
- 40.12:** 20 Gulden, medium green to hell green
- 40.13:** 25 Gulden, medium red to darker red
- 40.15:** 50 Gulden, purple
- 40.17:** 100 Gulden, light orange and orange

41. VOORHOEVE, DESIGN NEERBOSCH, REVERSE PRINTED SCHOOL & LOGO VOORHOEVE

Voorhoeve bought the printing tools and materials from Neerbosch. Initially Voorhoeve printed the uniface banknotes as printed by Neerbosch, but soon changed to printing on both sides, and dropping any reference to Neerbosch on the obverse. A 5 Gulden note was added to the range.

41.10: 5 Gulden, green

41.11: 10 Gulden, dark blue

41.13: 25 Gulden, dark red

41.17: 100 Gulden, light orange

43. DE NEDERLANDSE SCHOOLBANK

A rare set of banknotes, until a few years ago no complete set in single hands was known with a few denominations at the National Numismatic Collection, and two denominations in private hands. Now a near full Series is known, with the 50 Gulden still not seen.

It is not clear who manufactured these notes, but clearly intended for use at schools. Any additional info welcome.....

43.8a: 1 Gulden, no date. Green print, 120mm X 68mm

43.8b: 1 Gulden, no date. Purple print, 120mm X 68mm

48. NOORD NEDERLANDSE STEMPEL – EN LEERMIDDELENFABRIEK (N.N.S.L), PLASTIC, NO DATE

The previous plastic coins were frequently found by shopkeepers and retailers, or in dispensing machines for bubble gum or cigarettes, having been passed on as real coins. It became therefore forbidden in 1964 to distribute plastic coins, for educational purposes or otherwise. The above Series was released with approval from the Rijksmunt : the diameters are larger, there is no portrait nor Dutch shield on either side, and the design itself clearly different from original coins. None of the coins are dated. All coins have the value in centen (cents) on one side, and the value in words as popularly used bij people for such value on the other side.

48.2: 1 Cent, obverse = reverse. Brown coloured plastic, 17mm

48.4: 5 Cent, obverse 1 STUIVER, reverse 5 CENTEN. Brown coloured plastic, 22m

51. NOORD NEDERLANDSE STEMPEL – EN LEERMIDDELENFABRIEK (N.N.S.L), PLASTIC, NO DATE

A next Series by N.N.S.L. was issued around 1980, again based a fantasy design clearly distinct from real coins in circulation. Made from even thicker plastic, slightly larger, and both sides with a numeric value in a shield, with the value in centen (cents) below, and the popular name of such value above. None are dated. Both sides the same. Pieces are known in both medal strike, and coin strike.

The cent was discontinued from sets distributed from 1989 onward (after the Dutch original 1 cent piece last minted in 1980). A 5 Gulden piece was added in 1988.

Various plastic moulds were used, and the designs vary through the years. Most notably the first production runs were with (a) clear mint master and mint symbol, after this these (b) with details lost, to be replaced by (c) single dots only , or (d) with neither symbol nor dots.

A single 1 Gulden piece in red plastic is known: purpose not clear. Information welcome!

51.2a: 1 Cent, mint master signs clear. Brown coloured plastic. 18mm

51.2b: 1 Cent, mint master signs damaged. Brown coloured plastic. 18mm

CLASSROOM BLACKBOARD MONEY

Oversized coins and banknotes have been produced to use in schools for calculation sessions. These pieces are oversized, pictured at one side, and with a fastening-material at the other side (Velcro, or a magnet for example). The most prolific manufacturer and distributor was the N.N.S.L., but others existed as well.

These series were typically offered in boxes containing a few sets, and a school would typically have only one box, or a few at best. These boxes are encountered regularly but all rather scarce as a complete set certainly if in the original packaging.

60. NOORD NEDERLANDSE STEMPPEL – EN LEERMIDDELENFABRIEK (N.N.S.L.), SERIES 1

This set was available 1965 – 1980, with either only the coins, or as a set of coins plus banknotes. There are two different types of banknotes, looking very alike, but different as distributed over the years. The coins in both sets are the same. The first set of banknotes is on off-white velvet with a brown velvet backing, with the second set on white velvet. Some of the colours printed are different, especially on the 10 Gulden banknote. The banknotes of the first set are slightly larger than the those of the second set. Both sets used the same N.N.S.L. article number.....

63. NOORD NEDERLANDSE STEMPEL – EN LEERMIDDELENFABRIEK (N.N.S.L.), SERIES 3

This set was available 1982 – 1988 but included the 1 cent piece as a calculation-unit, the 1 cent denomination coin itself withdrawn from circulation in 1983. This set contained several of each denomination, and both the coins and banknotes were updated to the latest design in circulation. The coins and banknotes are made of plastic. All coins dated 1982, except the 1 Cent 1978, and the 5 Gulden is dated 1988.

The coins are printed one-sided, with a square magnet on the back. The banknotes are printed both sides, on flexible magnetic material.

PLAY MONEY SETS FOR SHOPPING PRETEND, OR PLAY

Below a few examples of toy-play sets for pretend shopping, or to play classroom. This are all low-priced items hence popular for small gifts at children's birthdays. Some of these playsets have German, or Great Britain inspired coins next to Dutch banknotes. No doubt these were cheaper to obtain than making themselves. No doubt many more varieties exist, none scarce nor rare.....

80. PANDA TOYS, AMSTERDAM, KASSAGELD,

A nice blister set containing chrome plated plastic toy coins, plus a set of banknotes. The coins have a fantasy design, with a large numeric value and CT or G in the centre, a star above, and SPEELGELD below. None carry a date and both sides are the same. The banknotes have the designs of those that were in circulation in the 1980', but a much smaller format, and in different colours to the originals.

Contrary to most toy-play sets the Panda set has – at least – clear reference in the coins to the Dutch cent and Gulden system.....Set comes with a “Eurocheque card 1992” and “Eurocheques”, so early 1980'....Blister pack 205mm X 335mm

80.4: 5 Ct., metalized bright gold coloured. 22mm

80.5: 10 Ct., metalized bright silver coloured. 17mm

80.9: 2 ½ G., metalized bright silver coloured. 29mm

80.10: 5 G., metalized gold coloured. 24mm

80.11: 10 Gulden, purple and pink. 76mm X 41mm

80.13: 25 Gulden, green and pink. 74mm X 41mm

80.15: 50 Gulden, yellow and green. 76mm X 41mm

80.17: 100 Gulden, green and grey. 82mm X 41mm

80.19: 250 Gulden, orange, blue and red. 84mm X 41mm

80.22: 1.000 Gulden, brown and pink. 86mm X 41mm

82. DOM PLASTIK, BAMBERG, GERMANY, SPEELGELD,

This blister set contains chrome plated coins clearly linked to Germany as for the colours and denominations. Yet in spite the word "SPIELGELD" on each coin, plus with copies of Dutch banknotes it was meant to be for the Dutch market. Blister-pack, 205mm X 335mm

The coins have a large numeral in the centre but no reference to any denomination including not to Deutsche Mark, nor to Cent nor to Gulden. The word "SPIELGELD" below the numerals. None carry a date and both sides are the same. The banknotes have the designs of those that were in circulation in the 1980', but a much smaller format, and in different colours to the originals.

82.2: 1, metalized bright copper coloured.

82.3: 2, metalized bright copper coloured.

82.4: 5, metalized bright bronze coloured.

82.5: 10, metalized bright bronze coloured.

Dr. Oetker is a household name in the Netherlands for a wide range of home bakery products, jams, and other alimentary products. They launched a play-set alongside some of their products. All banknotes are printed “SPEEL – GELD” diagonally, and “BANK VOOR KLEINE KOOPLIEDEN” horizontally. The set has four denominations, printed both sides.

WET INK STAMPS WITH REPRESENTATIONS OF COINS AND BANKNOTES

Around 1960 schools were looking for a more economical way to teach pupils the value of money and for calculations. Wet ink stamps were successfully marketed by companies like D.P. Luijendijk, and De Noord Nederlandse Stempel- en Leermiddelenfabriek (N.N.S.L.). The wet ink stamps could be wetted on an inkpad, in colours of choice, and the wet ink stamps used for a long period of time. Stamps were used representing coins in circulation, later also for stamping banknotes. On all wet ink stamps the value-side of the coins or banknotes were presented.

Initially the wet ink stamps were for the print of a single coin. Later wet ink stamps have multiple coins per stamp. The diameter of the stamped coin is indicated: the sizes of the various stamps themselves vary.

The most recent wet ink stamps have the coins of Queen Beatrix, dated 1982 onwards.

98. COIN - CARDS HUGO SEMMLER, HERMANN ROSTOCK, MAX HEIMBRECHT, WALTER ERHARD

From 1903 to 1938 coin-cards for over 50 countries were manufactured with embossed pictures of copper, nickel, silver and gold coins in circulation, plus an exchange-rate table for various currencies. These cards were manufactured mainly in Germany, by Hugo Semmler (Magdeburg or Berlin), Hermann Rostock (Berlin), Max Heimbrecht (Berlin – Schöneberg, or Berlin - Oranienburg) and Walter Erhard (Waiblingen, Altensteig, or Wildberg). A few smaller manufacturers are known, including in the Netherlands, but most of these cards with exchange rate tables known today are from these four sources.

The cards were used to guide travellers including early tourist but also used at schools. Cards are known with stamps of schools on the backsides to “prevent” going missing in action when handled by students.

These cards were sold loose, in sets, either in a cardboard sleeve, or in a presentation album.

Samsom was one of the distributors of these cards in Holland as listed in their catalogues in the 1930's.

Cards are known with headings, tables or texts in different languages including in German, French, English, Czech, Russian, combined Russian and French, and a few in Spanish, Portuguese and Dutch.

Designs: below list is for Dutch coin-cards designs only. For a listing of over 2.500 different coin-cards 1893 – 1938 please refer to “Numismatic Postcards 1893 – 1938”, available at the Newman Numismatic Portal, Washington University, St. Louis, U.S.A., free to download.

NETHERLANDS – NIEDERLANDE – NEDERLAND - LES PAYS BAS – PAISES BAJOS – NIZOZEMI

Eight designs are known, by Hugo Semmler Magdeburg (H.S.M.) , Hermann Rostock, Max Heimbrecht or Walter Erhard. The oldest confirmed postal date is stated.

DESIGN 1 – Hugo Semmler

- Copper Cent $\frac{1}{2}$, 1 and $2\frac{1}{2}$, KM 133, 132 and 134,
- Silver Cents 10 (1900), 25 (1897), KM 80 and 115,

99. BOARD GAMES WITH BANKNOTES, VALUES IN F, DFL, GLD, FL, FLORIJNEN, GULDEN,

Many board games have used play money in coins, chips or banknotes from the early 1800's onward, especially in Germany and Great Britain. Also in Holland a wide variety of games is known including banknotes with clear reference to the Dutch Gulden. Below just a few of those known to me, but many more will exist. Most banknotes are in one format and in single print on coloured paper.

F, fl, dfl stands for "florijn", or "Dutch Florijn", which is the old name for the Dutch Gulden.

EURO MONEY – INTRODUCTION

In 1992 members of the European Economic Community (EEC) decided to introduce one common currency replacing the individual national ones. The EEC was re-named as the European Union (EU). In 1995 the name EURO was chosen for the EU currency.

On the 1st January 2002 national currencies were abolished in 12 countries, replaced by the Euro, including in the Netherlands. In 2015 three additional countries joined the Euro as national currency.

The Euro was already introduced in 1999 in the respective national economies in parallel to their existing currencies. Also, in Dutch primary schools the teaching of Euro versus Dutch Guilders had already started from 1999 onwards. Educational material was supplied by distributors like the Noord Nederlandse Stempel & Leermiddelenfabriek ("N.N.S.L."), Jegro Educatief ("Jegro"), Wesco and Cats.

Below the educational Euro coins, and Banknotes, as supplied by these organisations. No doubt many more Euro series exist, but those listed here have been identified as exclusively for the Dutch Market, based old catalogues from distributors of school materials and the like.

EURO MONEY – NOORD NEDERLANDSE STEMPEL & LEERMIDDELENFABRIEK (N.N.S.L.),

These Euro products were offered by the N.N.S.L. from 1999 onward, in preparation of the introduction of the Euro. The range included Euro coins, banknotes, large versions of coins and banknotes for front – of the – classroom / blackboard, wet-ink stamps of the Euro Coins and Euro banknotes, plus a variety of toys and support materials for teaching children the value of the Euro.

The N.N.S.L. Euro coins are in plastic, coloured like the real coins. The design is free-lanced but close to identical to the real coins. Designs are the same on both sides.

The banknotes are made of paper, varied in size, printed one-side only, and in similar colours to the original notes but with a jolly figure added to the right.

The blackboard coins and banknotes are from plastic, at 300% of the real coins, close to original colours.

112. EURO MONEY, N.N.S.L., BANKNOTES SECOND SERIES, WITH “EURO”, NO PLAY – FIGURES, 2000

A second design by N.N.S.L., as listed in their catalogue 2000. These are similar as those of the first series but without the jolly figure to the right, replaced by designs like on the original Euro banknotes, including a yellow five – pointed star. The word “EURO” is added bottom left. Sizes are the same as above series. Printed on one side only, in shades of one colour.

- 112.1:** Five Euro. Shades of green - blue print. 105mm X 55mm
- 112.2:** Ten Euro. Shades of red print. 114mm X 59mm

113. EURO MONEY, N.N.S.L., BLACKBOARD SERIES COINS AND BANKNOTES, 1999

For use at the blackboard a series of oversized coins and banknotes. Made from plastic, printed one-side. Two versions: (a) for use on flannel – boards, or (b) for use on magnet board, so these pieces are known with either a flannel back, or with a square magnet on the back.

The coins are 300% their original size in colours close to the original coins, the banknotes the normal size but in one colour print with numbers in black, hence sufficiently different from the originals.

The set was housed in a wooden box, with slide – off wooden lid, containing 50 coins, and 30 banknotes.

115: A yellow plastic box housing the eight wet ink stamps 1 Euro Cent – 2 Euro

116. EURO MONEY, N.N.S.L., WET INK STAMPS, BANKNOTES, 2005

A matching set to the above wet ink stamps for coins, N.N.S.L. supplied also wet ink stamps for Euro banknotes. One denomination on each wet ink stamp, the wet ink stamps with a wooden handle.

116: A wooden box housing the seven wet ink stamps 5 Euro – 500 Euro.

JEGRO EDUCATIEF, AND JEGRO EDUCATIVE MERGED WITH THE N.N.S.L.

The N.N.S.L. and Jegro Educatief were the most prolific supplier of Euro educational monies to Dutch Schools for many years. In 2009 they merged, and the combined group was acquired by Heutink International in 2013. The brands N.N.S.L. and Jegro were continued for selected educational products though.

Below the Jegro Educatief ranges before – and after the merger with N.N.S.L.
